- **Steps to Reproduce:**
 - Check the results obtained on the **Products** page through Lighthouse.
- **Expected Result:** The expected score should be above 90 to achieve optimal performance.
- **Current Result:** The obtained score is 58, indicating suboptimal performance.
- **Evidence:**

Report ID: FrontDefect007

- **Severity:** Medium
- **Description:** Through the Lighthouse tool, it can be observed that the performance of the **Orders** page for mobile is slightly poor.
- **Steps to Reproduce:**
 - Check the results obtained on the **Orders** page through Lighthouse.
- **Expected Result:** The expected score should be above 90 to achieve optimal performance.
- **Current Result:** The obtained score is 58, indicating suboptimal performance.
- **Evidence:**

Report ID: BackDefect001

- **Severity:** Critical
- **Description:** Orders can be deleted from the order list, leading to a security and logistics issue, as it can disrupt the company's register and accounting.
- **Steps to Reproduce:**
 - Delete an order by a specific id from the API.
- **Expected Result:** A validation error should occur, as the order should not be deleted.
- **Current Result:** The order is successfully deleted, and there is no validation preventing it from being removed.
- **Evidence:**

Report ID: BackDefect002

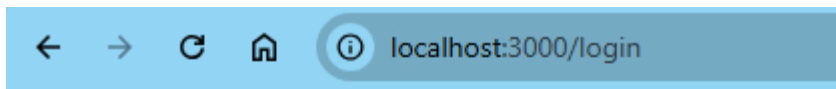

- **Severity:** High
- **Description:** Orders can be created with the same id. There is no validation to prevent creating a new order with an existing id.
- **Steps to Reproduce:**
 - Create an order with an existing id.
- **Expected Result:** A validation error should occur, indicating that a new order cannot be created with an existing id.
- **Current Result:** The order is successfully created, allowing multiple orders with the same ID, which could lead to search and editing issues.
- **Evidence:**

Report ID: BackDefect003

- **Severity:** High
- **Description:** Products can be created with the same id. There is no validation to prevent creating a new product with an existing id.
- **Steps to Reproduce:**
 - Create a product with an existing id.
- **Expected Result:** A validation error should occur, indicating that a new product cannot be created with an existing id.
- **Current Result:** The product is successfully created, allowing multiple products with the same ID, which could lead to search and editing issues.
- **Evidence:**

Report ID: BackDefect004

- **Severity:** Critical
- **Description:** The authorization token is visible after a successful login, which leads to a critical security failure in user privacy.
- **Steps to Reproduce:**
 - Login successfully.
- **Expected Result:** The authorization token should not be visible and should only be used internally by the server.
- **Current Result:** The token is visible after a successful login.
- **Evidence:**
